Re: CHEVY CHASE RESERVOIR —Community Meeting

Dear Glendale *Water & Power* Customer:

The Construction of the Chevy Chase 968 reservoir and pump station at the Chevy Chase Country Club golf course is approximately 70% complete. The replacement of the Reservoir and Pump Station is one of the major projects in Glendale *Water & Power's* current citywide water system improvement program.

You are invited to attend a community meeting on **Thursday, May 28, 2009 at 6:30PM at the Chevy Chase Country Club, 3067 Chevy Chase Drive.** Representatives from Glendale's *Water & Power* staff will be there to bring you up to date on the project status and to answer questions regarding the construction work since our last community meeting.

The meeting will start at 6:30 p.m. with a short project update followed by a tour of the project site. This will be the last opportunity to conduct site visits for the public as the construction is entering its final stages and will soon be unsuitable for site tours. We will provide a bus for residents to view the construction activities from the site itself. Please contact Helen Yoon at 1-866-785-0008 or at glendalereservoir@gmail.com if you need special accommodations during the tour or with any questions that you may have. If you plan on going to the project site please wear shoes and clothing that will not be damaged by the conditions of a construction site such as gravel and rocks.

We look forward to your continuing active interest in this important project.

Glendale *Water & Power* would like to thank the Chevy Chase Country Club for graciously offering their facilities.

Very truly yours,

Peter Kavounas,
Water Services Administrator
Glendale *Water & Power*
